

(a) The acceptance clock defines the information set

EDGAR acceptance timestamp t of the 10-K

admissible at t

- facts from submissions accepted by t
- the SIC code on the filing itself
- the CIK printed on the document
- Item 1A and Item 7 of this 10-K

inadmissible: known only later

- values restated in submissions after t
- the registrant's present-day SIC code
- a present-day filer universe
- training rows from cohorts at or after t

time

(b) Construction pipeline

Acquisition

- SEC bulk submissions archive
- 3,786 Item 1.03 8-K documents
- 52 DERA quarters (2012-2024)
- 59,499 primary 10-K documents

Point-in-time reconstruction

- acceptance timestamp as cutoff
- historical SIC, FIRE excluded
- as-filed DERA facts only
- CIK identity, PIT names

Event labelling

- 3,010 assembled events
- actual petition date as event time
- initial US Ch. 7/11 only
- 365-day forward horizon

Contamination audit (4 channels)

- restatement: negative / null
- SIC vintage: 2 positive obs. exposed
- survivor universe: composition shift
- random vs rolling: heterogeneous

Rolling benchmark

- 59,500 obs. / 437 positive obs.
- cohorts 2013-2024
- rolling-testable 54,351 / 408
- arms: ratios / text / combined
